

Industrial Manufacturing & Auto Control System

ASSOC OF APPLIED SCIENCE

Major code: 2224

Department: Industrial Manufacturing and Controls

Chair: Justin Blazzard

Advising: Justin Blazzard 541-881-5974

PROGRAM OVERVIEW

The Industrial Manufacturing and Control Systems AAS prepares students to work in a variety of automated electro-mechanical, product assembly, process control or product distribution industries that use programmable controls, instrumentation, troubleshooting and other methodologies to accomplish system management. Provides skills to define, integrate, install, program, maintain and operate complex control systems.

PROGRAM/DISCIPLINE OUTCOMES

At completion of the IMAC program, students will be able to:

- Demonstrate proper safety procedures when performing minor troubleshooting repairs.
- Devise maintenance routines for mechanical, hydraulic, and pneumatic systems.
- Employ appropriate diagnostic tools to troubleshoot, repair, and /or maintain production systems.
- Calculate total system amperage, voltage, and wattage.
- Connect motors, electrical connections and controllers to allow a Program Logic Controller (PLC) to properly operate a machine.
- Demonstrate correctly and perform periodic maintenance procedures.
- Troubleshoot system for errors or malfunctions.
- Apply correct procedures in setting up equipment to perform basic welds using OAW, SMAW, FCAW, and GTAW processes.
